

Experiment 7

Students Attendance System

AIM:

To create a simple cloud-based Students Attendance System using any Cloud Service Provider and demonstrate the Software as a Service (SaaS) model for managing student attendance details.

Procedure

1. Select a suitable Cloud Service Provider and create a cloud application.
2. Create an Attendance Form for storing student attendance details.
3. Add the required fields:
 4. Student Name
 5. Registration Number
 6. Course
 7. Present / Absent
 8. Course Attendance
 9. OD Request
 10. Attendance Percentage
 11. Grade
12. Enter the student details and mark the attendance as Present or Absent.
13. Record the OD (On-Duty) request when applicable.
14. Calculate the student's course attendance and attendance percentage based on the attendance records.
15. Assign the appropriate grade based on the attendance percentage.
16. Store the attendance information in the cloud database.
17. Deploy the application using the selected Cloud Service Provider.
18. Access the application through the internet and demonstrate it as a SaaS application.
