Hospital Information System

AIM:

To create a simple cloud-based Hospital Information System for SIMATS Hospital using any Cloud Service Provider and demonstrate the Software as a Service (SaaS) model for managing patient information.

Procedure

1. Select a suitable Cloud Service Provider and create a cloud application.
2. Create a Patient Registration Form for storing hospital information.
3. Add the required fields:
 - Patient Name
 - Age
 - Address
 - Phone
 - Email
 - Attender Name
 - Attender Phone
 - Doctor Name
 - Disease
 - Patient ID
4. Enter the patient and attender details into the application.
5. Record the assigned doctor name and disease details.
6. Store the patient information in the cloud database.
7. Allow authorized users to view and manage the stored patient records.
8. Deploy the application using the selected Cloud Service Provider.
9. Access the application through the internet to demonstrate the SaaS model.

IMPLEMENTATION

INPUT

The screenshot shows a web application interface for a hospital patient record. On the left is a dark sidebar with a user profile 'deepika.....p' and navigation links: 'Patient Records', 'Hospital Patient Record' (highlighted), and 'Patient Records List'. The main content area is titled 'Hospital Patient Record' and contains a form with the following fields:

- Name:** First Name 'DEEPIKA', Last Name 'P'.
- Attender Phone:** +91 6379764261.
- Email:** deepika07@gmail.com.
- Address:** Address Line 1 'maduravoyal', Address Line 2 'ration stop'.
- City / District:** chennai.
- State / Province:** Tamil Nadu.
- Postal Code:** 600095.
- Country:** India.
- Disease:** Fever.
- Phone:** +91 9876512345.
- Doctor Name:** Dr. Davis.
- Attender Name:** Kumar.
- Age:** 24.
- Patient Name:** Deepika.P.

A 'Submit' button is located at the bottom of the form.

OUTPUT

The screenshot shows the 'Patient Records List' and 'Patient Details' view. The 'Patient Records List' table displays a list of patients:

Patient ID	Patient Name	Age	Doctor Name
1000	Deepika.P	24	Dr. Davis
1001	Priya Sharma	35	Dr. Miller
1002	Ravi Raj	48	Dr. Williams

Below the table, it says 'Showing 3 of 3'. To the right, the 'Patient Details' panel shows the information for Patient ID 1000:

- Patient ID:** 1000
- Patient Name:** Deepika.P
- Age:** 24
- Address:** maduravoyal , ration stop, chennai, Tamil Nadu, 600095, India
- Phone:** +91 98765 12345
- Email:** deepika07@gmail.com
- Attender Name:** Kumar
- Attender Phone:** +91 63797 64261
- Doctor Name:** Dr. Davis
- Disease:** Fever

At the bottom of the details panel, there is a link to 'Add a comment'.

RESULTS

The SIMATS Hospital Information System was successfully created as a cloud-based application. The system manages patient details, attender information, doctor details, and disease information. The application successfully demonstrated the Software as a Service (SaaS) model using a Cloud Service Provider.
