

Experiment 8

Student Counselling System

AIM:

To create a simple cloud-based Student Counselling System using any Cloud Service Provider and demonstrate the Software as a Service (SaaS) model for managing student personal, academic, and counselling details.

Procedure

1. Select a suitable Cloud Service Provider and create a cloud application.
2. Create a form for storing student counselling details.
3. Add the required fields:
 - Student Name
 - Age
 - Address
 - Phone Number
 - Subjects Studied
 - Year of Passing
 - Percentage of Marks
 - Domain Interest
 - Counselling Remarks
4. Enter the personal and academic details of the students.
5. Record the student's domain interest for counselling purposes.
6. Enter suitable counselling remarks based on the student's details and interests.
7. Store the student information in the cloud database.
8. Allow the stored student records to be viewed and managed through the application.
9. Deploy the application using the selected Cloud Service Provider.
10. Access the application through the internet to demonstrate the SaaS model.

RESULTS

The Student Counselling System was successfully created as a cloud-based application. The application successfully demonstrated the Software as a Service (SaaS) model using a Cloud Service Provider.
