

Experiment 2

Mark Sheet Processing System

AIM:

To create a simple cloud-based Mark Sheet Processing System using any Cloud Service Provider and demonstrate the Software as a Service (SaaS) model for processing and managing student marks.

Procedure

1. Select a suitable Cloud Service Provider and create a cloud application.
2. Create a form for entering student mark details.
3. Add the required fields:
 - Name of the Student
 - Registration Number
 - Subjects
 - Marks
 - Total Marks
 - Average
 - Percentage
 - Rank
 - Overall Performance
4. Enter the marks obtained by the student in each subject.
5. Configure the application to calculate the Total Marks, Average, and Percentage automatically.
6. Record the Rank of the student based on the marks obtained.
7. Display the student's Overall Performance based on the processed marks.
8. Store the student mark-sheet details in the cloud database.

9. Deploy the application using the selected Cloud Service Provider.

IMPLEMENTATION

INPUT

The screenshot displays the 'Mark Sheet Processing' web application. The interface is divided into a sidebar on the left and a main content area on the right. The sidebar contains the application logo 'ddeepikaa' and two menu items: 'Mark Sheet Processing' (selected) and 'Mark Sheet List'. The main content area is titled 'Mark Sheet Processing' and contains a form with the following fields:

Field	Value
Student Name *	Deepika.P
Student Registration Number *	192525026
Subject 1	Maths
Subject 2	Computer Science
Subject 3	English
Subject 4	chemistry
Subject 5	Physic
Marks for Subject 1	93
Marks for Subject 2	95
Marks for Subject 3	90
Marks for Subject 4	94
Marks for Subject 5	98
Total Marks	470
Percentage	90
Average	90.3
Rank	2
Overall Performance	Outstanding

At the bottom of the form, there is a blue 'Submit' button. The top of the browser window shows the URL 'ddeepikaa', a 'Development' tab, and user information including 'View as -MySelf-' and a trial expiration notice.

OUTPUT

The screenshot displays the 'Mark Sheet Processing System' web application. The interface is divided into a dark sidebar on the left and a light main content area. The sidebar contains a user profile for 'ddeepikaa' and a menu with 'Mark Sheet Processing' and 'Mark Sheet List'. The main content area is titled 'Mark Sheet List' and features a table with two rows of student data. The first row is highlighted in purple. To the right of the table is a 'Mark Sheet Details' section for the first student, Deepika.P, which lists her marks for five subjects and calculates her total marks, average, and percentage.

Student Name	Student Registration N...	Subject 1
Deepika.P	192525026	Maths
Vaishnavi	192525027	Maths

Student Name	Deepika.P
Student Registration Number	192525026
Subject 1	Maths
Marks for Subject 1	93
Subject 2	Computer Science
Marks for Subject 2	95
Subject 3	English
Marks for Subject 3	90
Subject 4	chemistry
Marks for Subject 4	94
Subject 5	Physic
Marks for Subject 5	98
Total Marks	470
Average	90.30
Percentage	90.00

RESULTS

The Mark Sheet Processing System was successfully created as a cloud-based application. The system allows student details and subject-wise marks to be entered and processes the Total, Average, Percentage, Rank, and Overall Performance. The application was successfully demonstrated using the Software as a Service (SaaS) model.
