

Experiment 6

Payroll Processing System

AIM:

To create a simple cloud-based Payroll Processing System using any Cloud Service Provider and demonstrate the Software as a Service (SaaS) model for managing employee salary details.

Procedure

1. Select a suitable Cloud Service Provider and create a cloud application.
2. Create a form for entering employee and payroll details.
3. Add the required fields such as:
 - Employee Name
 - Employee ID
 - Experience in Present Organization
 - Overall Experience
4. Enter the employee details and salary components.
5. Calculate the Gross Pay by adding Basic Pay, HRA, DA, TA and other allowances.
6. Calculate the Net Pay by subtracting deductions from Gross Pay.
7. Store the payroll information in the cloud database.
8. Deploy the application using the selected Cloud Service Provider.
9. Access the application through the internet and verify the processed payroll details.
10. Demonstrate the application as a Software as a Service (SaaS) solution.

OUTPUT

The screenshot displays a web application interface for payroll processing. The left sidebar shows a navigation menu with 'Payroll Processing' and 'Payroll Processing List'. The main area is titled 'Payroll Processing List' and contains a table with two rows of employee data. The right panel, titled 'Payroll Details', shows a breakdown of pay components for the selected employee, 'deepika'.

Employee Name	Employee ID	Department	Designation
deepika	192525026	it	Software engineer
priya	0221	Human Resource	HR executive

Employee Name	deepika
Employee ID	192525026
Department	it
Designation	Software engineer
Basic Pay	₹ 30,000.00
HRA	₹ 12,000.00
DA	₹ 5,000.00
TA	₹ 3,000.00
Gross Pay	₹ 52,000.00
Deductions	₹ 4,000.00
Net Pay	₹ 48,000.00

RESULTS

The Payroll Processing System was successfully created as a cloud-based application. The system manages employee details, experience, Basic Pay, HRA, DA, TA, Gross Pay, Deductions, and Net Pay. The payroll details were successfully processed and the application demonstrated the Software as a Service (SaaS) model.
