

Experiment 1

Car Booking Reservation System Using Zoho One (SaaS)

AIM:

To create a simple cloud-based Car Booking Reservation System using any Cloud Service Provider and demonstrate the Software as a Service (SaaS) model with necessary fields for cab search and reservation.

Procedure

1. Select a suitable Cloud Service Provider for deploying the application.
2. Create a simple Car Booking Reservation System as a cloud-based application.
3. Design the application interface with the required booking fields.
4. Provide an option to search for available cabs.
5. Add the From and To locations for specifying the journey.
6. Provide booking options such as:
 - Rental
 - Outstation
 - Package type
 - Hours/Days
7. Allow the user to enter the required booking details.
8. Process the entered details and search for suitable cab options.
9. Display the available cab/booking details as the output.

OUTPUT

The screenshot displays a Zoho One application interface for a car booking reservation system. The interface is divided into three main sections: a sidebar, a main content area, and a right-hand panel.

Sidebar: The sidebar is dark blue and contains the user profile 'Deepika.P' at the top. Below it are two menu items: 'Book a Cab' and 'Bookings'. The 'Bookings' item is highlighted with a blue background and a white icon.

Main Content Area: The main content area is titled 'Bookings' and displays a table of booking records. The table has columns for 'Customer Name', 'Employee ID', and 'Email Id'. The records are filtered by date, showing bookings for 02-Oct-2026, 03-Oct-2026, and 06-Oct-2026. The first record for 02-Oct-2026 is expanded, showing details for 'DEEPIKA P' with Employee ID '192525026' and Email 'deepikaeps14@gmail.com'. The second record for 03-Oct-2026 is for 'vaishnavi k' with Employee ID '192525027' and Email 'vaishnavi07@gmail.com'. The third record for 06-Oct-2026 is for 'tamil selvan R' with Employee ID '192525019' and Email 'kolar19@gmail.com'. The table shows 'Showing 3 of 3' records.

Right-hand Panel: The right-hand panel is titled 'Overview' and displays a detailed view of the selected booking. It contains a table with the following information:

Field	Value
Customer Name	DEEPIKA P
Employee ID	192525026
Email Id	deepikaeps14@gmail.com
Mobile Number	+916379764261
Gender	Female
Booking Date	01-Oct-2026
Travel Date	02-Oct-2026
Pickup Time	Time 1
Pickup Address	47/a kandhasamy nagar 8th str maduravoyl, maduravoyal bus stop, chennai, Tamil Nadu, 600095, India
Destination Address	madurai, madurai bus stop, madurai, Tamil Nadu, 600095, India

Below the table, there is a link to 'Add a comment'.

RESULTS

Thus, a Car Booking Reservation System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
